Interview Someone You Know

New Word - Interesting Fact
The person you are interviewing is called the “talent”.

Step 6
Questions Script
Get paper and pencil and write out your questions script.
What will you be asking the “talent”?
What do you want to know about them?
What would be interesting to know?

Production Step 7 Camera Angles & Shots

To the right are some standard interview camera angles and shots. Use the “rule of thirds”. The “talent” should not be in the center of the camera view.

When the video process starts, be sure to tell the “talent” to not look at the camera. They should look at you while the camera is off to the side just a little bit. If you have a tripod or a way to keep the camera stationary, that would help.

Here are some easy ways to video the talent; sitting down, standing up, or following them around as they do something like wash the dishes, take out the trash, work at their computer.

You can also sit with them and video both of you if you have a tripod. In this case no one looks at the camera.

You will see that in one of the Obama interviews the camera shot is “over the shoulder”. If you have a tripod you can try this one.

Post-Production

Step 8

Edit Video & Audio

Now is the time to use a video editing application. If you are using your computer and iMovie or another editing application, you will need to transfer your camera files to your computer. Cell files can be edited on the cell if you have the app.

After you do that you will open the chosen application and begin editing.

You might have a mobile app to edit with. Use that if you prefer.

If you videoed using an iPad you may have an app there.

Editing - If you do not have an editing app, search the internet to find something. Check these lists, too.
